

# Week 11: Homework 1: Depth-First Traversal: The Maze

Q3 => Conduct Depth First Traversal (DFT) on a maze

# Week 11: Homework 1: Depth-First Traversal: The Maze

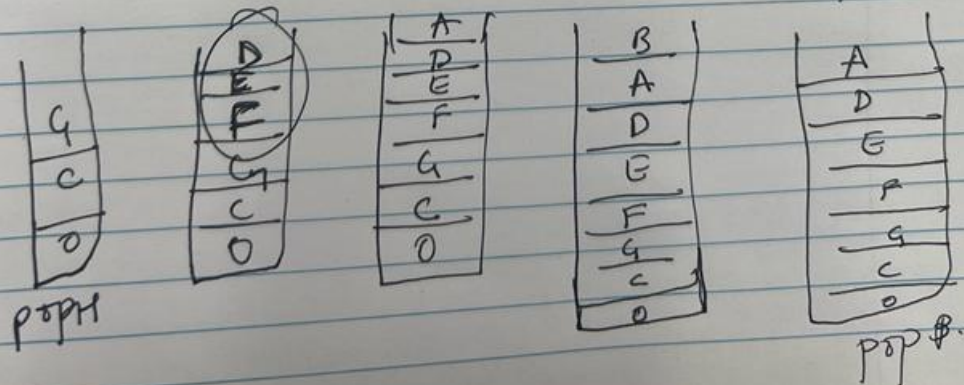

Approach 2

# Week 11: Homework 1: Depth-First Traversal: The Maze

Unclear Route (Hotel, Hospital) — Approach 3:  
 Search Sequence is Right, left, Top, Bottom. <sup>wheel robot move in Hotel: DFS</sup>

## Week 11: Homework 1: Depth-First Traversal: The Maze

# Week 11: Homework 1: Depth-First Traversal: The Maze

Code

```
from typing import List

class Solution:
    def hasPath(self, maze: List[List[int]], start: List[int], destination: List[int]) -> bool:
        m = len(maze)
        n = len(maze[0])
        dirs = [0, 1, 0, -1, 0]
        seen = set()

        def isValid(x: int, y: int) -> bool:
            return 0 <= x < m and 0 <= y < n and maze[x][y] == 0

        def dfs(i: int, j: int) -> bool:
            if [i, j] == destination:
                return True
            if (i, j) in seen:
                return False
            seen.add((i, j))
            for k in range(4):
                x = i
                y = j
                while isValid(x + dirs[k], y + dirs[k + 1]):
                    x += dirs[k]
                    y += dirs[k + 1]
                if dfs(x, y):
                    return True
            return False
        return dfs(start[0], start[1])
```

Result with different test scenarios :

# Week 11: Homework 1: Depth-First Traversal: The Maze

```
maze = [[0, 0, 1, 0, 0],
[0, 0, 0, 0, 0],
        [0, 0, 0, 1, 0],
        [1, 1, 0, 1, 1],
        [0, 0, 0, 0, 0]]
start = [0, 4]
destination = [4,
4]
```
